MEMORANDUM FOR:

THROUGH:

SUBJECT:

Construction of Landlines, China

REFERENCE:

Requirement No. NSA/SOC/R-44-70
NPIC Project No. 250571

25X1

1. In response to the referenced requirement, an effort was made to locate a landline along the road between Pang Ta (30-13N 097-25E) and Patang (30-01N 098-56E), China. The results are generally negative due to lack of high resolution photography.

2. The entire search area is covered by small-scale photography which is of inadequate interpretability to permit identification of poles or cable traces. The only large-scale, high-resolution coverage of the road reveals a single row of poles (without crossarms) along an approximately 4.0 nautical mile (nm) section of the road between coordinates 30-12-00N 097-17-50E and 30-08-15N 097-20-55E.

3. Questions concerning this project may be directed to the imagery analyst, [redacted] of the China, North Korea Branch EGD/IEG, on extension [redacted]. This project is considered to be complete.
